Kigali, 27th September 2026

WEATHER FORECAST FOR THE MONTH OF OCTOBER, 2026

1. Summary: During the month of October 2026, rainfall ranging between 90 and 300 mm is expected across the country. Expected rainfall will be above the range of the Long-Term Mean (LTM) of October. The LTM for October ranges between 68 and 278 mm. The first (1st) dekad of October 2026, is expected to be within the normal range of the LTM of the 1st dekad of October, while the second (2nd) and third (3rd) dekads are expected to receive above LTM rainfall. The maximum temperature is expected to range between 20°C and 31°C while the minimum temperature is expected to be in the range of 9°C to 19°C. Moderate to strong wind speed is predicted to range between 4 to 14 m/s across the country.

2. Rainfall forecast: The highest rainfall amount ranging between 240 and 300 mm is expected in Musanze and Nyabihu Districts, several parts of Rubavu, Ngororero and Nyamasheke Districts, central and northwestern parts of Rusizi District, northern and western parts of Burera District, western parts of Gakenke District as well as northeastern parts of Rutsiro District. Rainfall ranging between 180 and 240 mm is forecasted in the remaining parts of Western Province, several parts of Gakenke and Nyamagabe Districts, northern and western parts of Nyaruguru and Muhanga Districts, small portion of western parts of Ruhango District and northwestern parts of Rulindo District. Rainfall ranging between 120 and 180 mm is predicted in Kigali City, remaining parts of Northern Province same as remaining parts of Nyaruguru, Nyamagabe and Muhanga Districts, several parts of Huye, Ruhango, Kamonyi, Gatsibo and Nyagatare Districts, small portion of western parts of Kayonza District, northern and western parts of Rwamagana District and small portion of southwestern parts of Gisagara District. The remaining parts of the country are expected to receive rainfall ranging between 90 and 120 mm.

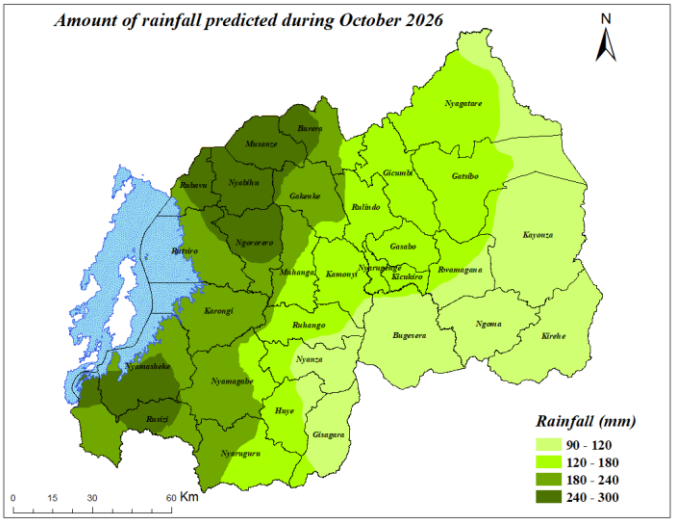

3. Wind forecast: Strong wind speed ranging between 8 and 14 m/s (Orange color), is predicted in several parts of Rubavu and Karongi Districts, central parts of Rutsiro District as well as northern parts of Nyamasheke District. Moderate to strong wind speed ranging from 6 to 8 m/s (Yellow color) is expected in the remaining parts of Rubavu and Rutsiro Districts, central parts of Karongi District, central and eastern parts of Nyamasheke District, eastern and western parts of Rusizi District, western parts of Nyabihu, Ngororero, Nyamasheke and Nyaruguru Districts, northern and western parts of Musanze District, central parts of Huye, Rulindo and Gicumbi Districts, northwestern parts of Gatsibo District as well as small portion of southern parts of Nyanza District. The remaining parts of the country are expected to experience moderate wind speed ranging between 4 to 6 m/s (Green color).

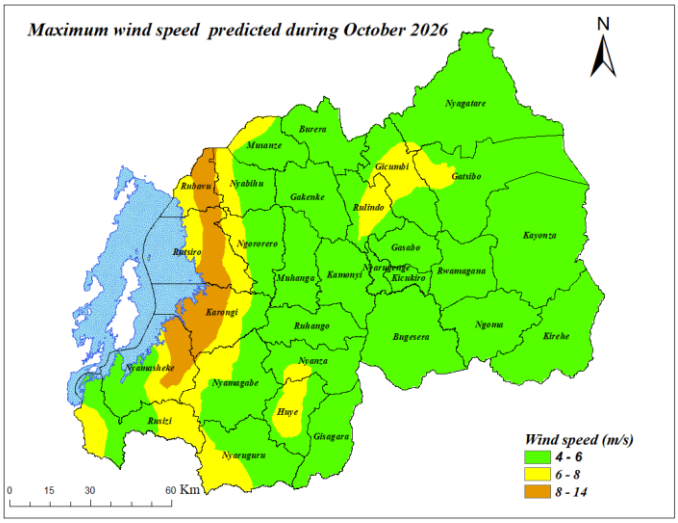

4. **Temperature forecast**

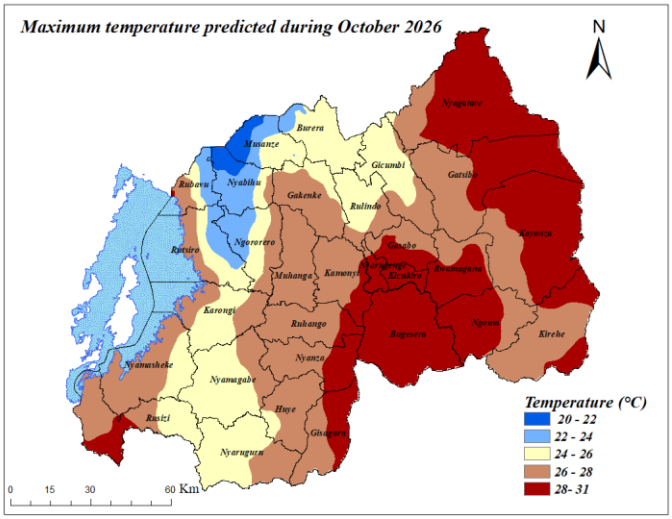

- **Maximum temperature:** The highest maximum temperature, ranging between 28°C and 31°C, is expected in Bugesera District, several parts of Kigali City and Nyagatare, Gatsibo, Kayonza, Rwamagana and Ngoma Districts, small portion of southern and northern parts of Kirehe District, Amayaga region as well as Bugarama plain. The lowest maximum temperature, ranging from 20°C to 22°C, is expected in western and northern parts of Musanze District and northwestern parts of Nyabihu District.
- **Minimum temperature:** The lowest minimum temperature, ranging between 9°C and 11°C, is expected in several parts of Nyabihu District, western parts of Musanze District, northwestern parts of Ngororero District, western parts of Nyaruguru District, southern and western parts of Nyamagabe District and eastern parts of Rusizi District. In contrast, the highest minimum temperature, ranging between 17°C to 19°C, is expected in southern parts of Gasabo District as well as northern parts of Nyarugenge and Kicukiro Districts.

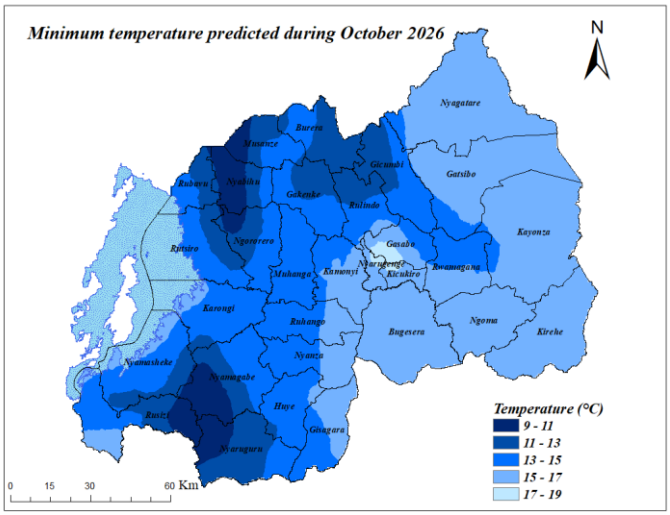

5. Advisory: Due to expected strong wind across the country, the public is advised to follow the guidance provided by the Ministry in charge of Emergency Management (MINEMA), as well as other relevant authorities, in order to mitigate the likely potential impacts of strong wind together with increased rainfall.
